Firewall-as-a-Service (FaaS)

Tomorrow is never a good time to secure your environment.

CCS Group

> **State of the Art** Enterprise Firewall

24 x 7 Monitoring Availability, Utilization, and Performance

Comprehensive Security Reviews Conducted by Certified Engineers

Turn-Key Configuration

and Implementation for new locations

A Secure Networking and WiFi Solution

that you don't have to maintain or manage

A Fully Managed Model

where you pay monthly for what you need and can easily scale as you grow

A Single, Predictable

monthly subscription for service and support

There's a Problem

In today's business climate, network services are becoming more complex and mobile. Reducing complexity and quickly scaling is crucial. These technology headaches take you away from what matters most to you, your business.

We Can Help

Our Firewall-As-A-Service solution provides your business with Enterprisegrade security configured and managed by certified engineers at an affordable monthly operating cost. The flexible FaaS solution allows you to choose firewall, switching, and wireless networking options best suited to your business security needs. Reducing your headaches is a no-cost feature.

- Allow certified engineers to monitor and maintain your firewall 24/7/365 to prevent unwanted threats to your business network.
- Avoid large up-front expenses to build or refresh your network. With FaaS there is no equipment to purchase.
- One low monthly fee that includes hardware, monitoring, and management.

Benefits of Firewall-as-a-Service

- Monitoring 24/7/365
